

New handoff

Brand to Product Handoff Guide

Everything the brand designer provides so the product designer can build a consistent admin dashboard for the Marina Management System, a multi-location marina operations SaaS (web, desktop first).

50 to 950

Version

Handoff date

Master Figma library

How to use this guide

This PDF is the **reference** for the brand. The **Figma library** is the working source of truth: the product designer copies values from Figma, never from this PDF. When something changes, update Figma first, then issue a new version of this guide.

Visual values in this version were taken from the approved UI reference. Gray fields are the few items still to fill: links, names, dates and sign-off.

Step	Who	What happens
1. Fill	Brand designer	Complete every gray field in sections 02 to 16 and link the files.
2. Review	Product designer	Reads the guide, flags gaps and questions in the feedback channel.
3. Pressure test	Product designer	Builds one dense test screen with the brand (section 17).
4. Fix	Brand designer	Resolves issues found, updates Figma and this guide.
5. Sign off	Both	Mark sections approved, record version and date.

Contents

17 Deliverables and sign-off	20

Section 01

Project info and status

Basic details and a status tracker. Update the status column as each section is completed and reviewed.

Brand / product	Marina Management System	Product type	Vertical SaaS for marina operators: admin and manager web portal for marinas, berths, bookings, staff and billing across cities and counties
Brand designer	name, contact	Product designer	name, contact
Version	v1.0	Handoff date	
Figma library	link	Asset folder	link
Feedback channel	Figma comments + weekly sync	Review cadence	Weekly until sign-off

Section status

#	Section	Owner	Status (circle one)	Notes
01	Project info and status	Both	Not started / In progress / Approved	
02	Logo and identity	Brand	Not started / In progress / Approved	
03	Color system	Brand	Not started / In progress / Approved	
04	Typography	Brand	Not started / In progress / Approved	
05	Spacing, grid and layout	Brand	Not started / In progress / Approved	
06	Shape, borders and elevation	Brand	Not started / In progress / Approved

16	Brand context and product rules	Brand	Not started / In progress / Approved	
17	Deliverables and sign-off	Both	Not started / In progress / Approved	

Section 02

Logo and identity

Every logo variant in SVG and PNG, light and dark, sized for the places it actually appears inside the product.

Asset	Where it appears in product	Formats	Light	Dark	File link
Primary logo	Login, sign-up, onboarding	SVG, PNG	☐	☐	
Horizontal logo	Expanded sidebar, top left (mark + wordmark, 24 px mark, 22 px wordmark)	SVG, PNG	☐	☐	
Stacked logo	Splash screen, empty states	SVG, PNG	☐	☐	
Logomark only	Collapsed sidebar, loaders, avatar fallback	SVG, PNG	☐	☐	
Favicon	Browser tab, 16 / 32 / 48 px	ICO, PNG, SVG	☐	☐	
App icon	PWA, desktop, mobile, 180 / 192 / 512 px	PNG	☐	☐	
Email logo	Transactional email header	PNG @2x	☐	☐	
Monochrome	Exports, watermarks, invoices	SVG	☐	☐	

Usage rules

Rule	Specification
Logo style	Solid rounded logomark in Ink #17191E, wordmark in Poppins Medium, Ink color, set beside the mark
Clear space	Half the logomark height on all sides; mark to wordmark gap = 0.5 x mark height
Minimum size	Full logo 96 px wide / logomark 16 px
Allowed backgrounds	White, Sidebar #F1F0EC, the yellow to blue-gray canvas gradient; reversed (white) on Primary 800 #2F3740 and darker
Misuse	No stretching, recoloring outside Ink or white, shadows, rotating, outlines, or placing on busy photos
Co-branding	Partner logo right of ours, separated by a 1 px #E5E5E1 divider, matched to our wordmark height

Why it matters. The collapsed sidebar shows the logomark at roughly 24 to 32 px. Test the mark at that size before handoff; detailed marks often fall apart.

Section 03

Color system

Brand swatches alone are not enough. Provide full scales and functional colors so every surface and state has a defined value.

3.1 Brand colors

Primary · Slate
#2F3740

Secondary · Teal
#497079

Accent · Sunlight
#F7E8A6

Highlight · Green
#0E9A50

Color	Role in product	HEX	RGB	HSL
Primary Slate	Main CTAs (Post, Download), active nav, focus, dark icon buttons	#2F3740	47, 55, 64	212, 15%, 22%
Secondary Teal	Charts and progress rings, info states, selected highlights	#497079	73, 112, 121	191, 25%, 38%
Accent Sunlight	Highlight pills (In flow), promo and update cards, AI sparkle (#FBBE3C)	#F7E8A6	247, 232, 166	49, 84%, 81%
Highlight Green	Text links and actions (Subscribe), New tags, progress fills, online dot	#0E9A50	14, 154, 80	148, 83%, 33%

3.2 Tonal scales

Each step is used for hover, pressed, subtle fills, borders and text. The dot marks the base step taken from the reference.

50100200300400500600700800900950

#656565

#484848

#36363A

#26272B

#17191E

#0E0F12

Neutral tint

Warm gray (slight yellow), matches the sidebar #F1F0EC

Base step

Primary 800, Secondary 600, Accent 400, Ink = Neutral 900

Fill gray fields, link the files, mark each section approved.

05

3.3 Semantic colors

State	Base	Light bg	Text on light bg	Border	Used for
Success	#0E9A50	#E7F5EC	#0B6B37	#B7E1C6	Confirmations, completed
Warning	#E0A11B	#FDF4DC	#8A5A00	#F3D58A	Pending, limits near, needs attention
Error	#D93B3B	#FDECEC	#A12424	#F4BBBB	Failures, validation, destructive actions
Info	#497079	#E8F0F1	#2F4D53	#C3D5D8	Tips, neutral notices, beta labels

Success and Info come straight from the reference greens and teals. Warning and Error are not shown in the reference and were derived to sit with the palette.

3.4 Surface and text roles

Role	Light mode	Dark mode	Notes
App canvas	Gradient #EAE7A6 to #BDC8CB	#0E0F12	Behind the app frame on marketing and login only
Page background	#FFFFFF	#121417	Main content and right panel
Surface / card	#FFFFFF	#1A1D21	Cards separated by borders, not fills
Raised (popover, modal)	#FFFFFF	#22262B	With elevation 2 or 3
Sidebar	#F1F0EC	#16181B	Warm neutral, not brand tinted
Text primary	#17191E	#F2F2EF	Headings, names, numbers
Text secondary	#484848	#B9BCBF	Body text, nav labels
Text disabled / muted	#656565	#7C8187	Timestamps, counters (7/10)
Border default	#E5E5E1	#2A2E33	Cards, composer, inputs
Border strong	#D9D9D6	#3A3F45	List dividers, hovered inputs
Overlay / scrim	#17191E at 40%	#000000 at 60%	Behind modals and drawers

3.5 Dark mode rules

- ☐ Brand colors adjusted for dark surfaces: Secondary uses step 300, Highlight green uses #34C27A, Primary buttons flip to Neutral 50 with Ink text
- ☐ Shadows replaced or reduced, elevation shown with lighter surfaces
- ☐ Logo dark versions supplied and tested
- ☐ Chart palette (#0EA5E9, #10B981, #3B82F6, #06B6D4, #14B8A6) checked on the dark navy background #0C1220
- ☐ Default theme decided: Light, with dark as a user setting

Section 04

Typography

Marina admin screens live at small sizes. The scale must cover 11 to 14 px for booking and berth tables, and the UI font needs tabular numerals for prices, dates and berth counts.

Role	Typeface	Weights	Source and license	Tabular nums
Display / headings	Poppins	500, 600	Google Fonts, SIL Open Font License	✗
UI / body	Poppins	400, 500, 600	Google Fonts, SIL Open Font License	✗
Numbers in tables	Inter (tnum on)	400, 500	Google Fonts, SIL Open Font License	✓

Type scale

Token	Size px	Line height	Weight	Tracking	Used for
display	32	40	600	-1%	Hero moments, promo titles
h1	26	34	500	-0.5%	Page titles, logo wordmark size
h2	22	30	500	-0.5%	Section titles (panel headers)
h3	18	26	500	0	Card and panel titles
body-lg	16	26	400	0	Long text, forms
body	15	24	400	0	Default UI text, nav items, post text
body-sm	13	20	400	0	Booking, berth and staff table cells
caption	12	18	400	0	Helper text, timestamps
label	11	16	500	+2%	Chart axes, status tags, sidebar group labels (DASHBOARDS, MANAGEMENT)
kpi	32	40	600	-1%	Stat cards (Total Marinas, Active Berths, Monthly Revenue, Occupancy Rate)

Rules

Rule	Decision
Tabular numbers	Poppins has proportional numerals only, so table and stat numbers use Inter with tabular figures
Weights in use	400 body, 500 headings and nav, 600 names, buttons and numbers. No light or bold weights
Uppercase usage	Sidebar group labels and overlines only, label token, +2% tracking
Max line length	70 characters for paragraphs
Fallback stack	Poppins, system-ui, -apple-system, Segoe UI, sans-serif

Section 05

Spacing, grid and layout

A shared spacing scale and layout frame keep screens consistent and make density decisions explicit.

Token	Value px	Typical use
space-1	4	Icon to label, tight gaps
space-2	8	Inside pills, between stat icon and number
space-3	12	Icon to nav label, form field gaps
space-4	16	Card padding (compact), list row padding
space-5	20	Gap between action pills
space-6	24	Card padding, gaps between cards
space-8	32	Section spacing, sidebar side padding
space-10	40	Gap between feed items
space-12	48	Page top spacing

Base unit 4 px Density modes Comfortable (default), compact for tables

Layout frame

Item	Specification
Sidebar width	Expanded 260 px / collapsed 72 px
Top bar height	64 px
Content max width	Fluid main column, 640 to 720 px content width; right panel 352 px
Grid	12 columns, gutter 24 px, margin 32 px
Table row height	Compact 40 px / default 52 px
Form field height	Small 32 / medium 40 / large 48 px
Nav item height	44 px, 8 px apart

Breakpoints

Name	Min width px	Layout behavior
Mobile	0	Sidebar becomes a drawer, right panel moves below the content
Tablet	768	Sidebar collapses to icons, right panel below content
Laptop	1024	Sidebar expanded, right panel hidden behind a toggle
Desktop	1440	Full three-column layout: sidebar, content, right panel

Section 06

Shape, borders and elevation

Corner radius, borders and shadows carry a lot of the brand's personality inside a product.

Shape personality	Soft and rounded, pill-shaped buttons and tags	Borders vs shadows	Borders lead; shadows almost absent
-------------------	--	--------------------	-------------------------------------

Corner radius

Token	Value px	Applied to
radius-sm	6	Checkboxes, small inputs, tooltips
radius-md	12	Dropdowns, video player, images
radius-lg	16	Cards, composer box, panels
radius-xl	20	App frame, promo cards, modals
radius-full	9999	Buttons, avatars, pills, tags, toggles, icon buttons

Borders

Type	Width	Color	Used for
Default	1 px	#E5E5E1	Cards, inputs, dividers
Strong	1 px	#D9D9D6	Hovered inputs, list dividers
Focus ring	2 px + 2 px offset	#497079	Keyboard focus on all interactive elements

Elevation

Level	Shadow value	Used for
0	none	Flat surfaces
1	0 1px 2px rgba(23,25,30,0.04)	Cards (optional, borders preferred)
2	0 8px 24px rgba(23,25,30,0.08)	Dropdowns, popovers, tooltips
3	0 16px 48px rgba(23,25,30,0.12)	Modals, dialogs, command menu

Brand graphics

Element	Specification	Allowed where
Gradients	Canvas: #EAE7A6 (top left) to #DBDBDB to #BDC8CB (bottom right). Glow: #F7E8A6 soft radial behind highlight pills	Login, onboarding, marketing, highlight pills, promo cards
Patterns / textures	Fine square grid, 1 px lines at 8% Ink, on Accent 100 to 200	Promo and update cards only

Rule. Keep decorative graphics out of working screens such as forms and settings. They compete with content and age quickly.

Section 07

Component direction

The brand designer sets the look and feel; the product designer builds the actual component system. Give direction and a few reference samples, not a full library.

Component	Brand direction	Reference link
Buttons	Pill shape. Primary: Slate #2F3740 fill, white 600 text. Secondary: white with 1 px border, optional leading icon. Icon buttons: 40 px circles with 1 px border	
Inputs and selects	Large text areas as bordered cards (radius 16). Search: borderless with leading icon and bottom divider. Selects: text + chevron, no box	
Cards	White, 1 px #E5E5E1 border or divider only, no shadow, padding 24	
Badges and tags	Pill, white or tinted fill, 600 weight, 12 px. New tag: white pill, green text	
Navigation	Warm sidebar #F1F0EC, 20 px outline icon + label. Active: filled icon, Ink text, 3 px Slate bar on the left edge	
Tabs	Text tabs with a 2 px Slate underline on the active tab	
Modals and drawers	Radius 20, white, padding 32, scrim #17191E at 40%	
Tooltips	Slate #2F3740 background, white 12 px text, radius 6, no arrow	
Toasts	Bottom right, white card with border and a colored leading icon per state	
Tables	Thin row lines, no zebra, #F8FAFC header, default density	
Stat cards	32 px number, trend pill (+12% vs last month), icon top right, optional sparkline	

Status badges

Status	Color	Style	Label text
Active	Ocean blue #0369A1, white text	Solid	Active, Confirmed, Available
Pending	Amber #B45309 on #FEF3C7	Soft	Pending
Cancelled	Red #DC2626, white text	Solid	Cancelled
Maintenance	Coral #C2410C on #FFEDD5	Soft	Maintenance (kept separate from Cancelled red)
Neutral	Slate #475569 on #F1F5F9	Soft	Occupied, Reserved, On Leave

Section 08

Interactive states

Every interactive element needs consistent states. Without direction these get invented screen by screen.

State	Primary button	Secondary button	Input	Nav item / row
Default	#2F3740 fill, white text	White, #E5E5E1 border	White, #E5E5E1 border	#484848 text, outline icon
Hover	#3E4751	#F1F0EC fill	#D9D9D6 border	#E8E7E2 fill
Pressed / active	#1F252B	#E5E5E1 fill	n/a	#E5E5E1 fill
Focus (keyboard)	2 px #497079 ring, 2 px offset	Same ring	#497079 border + ring	Same ring
Selected	n/a	n/a	n/a	Ink text, filled icon, 3 px Slate left bar
Disabled	40% opacity	40% opacity	#F1F0EC fill, #A3A39F text	#A3A39F text
Loading	White spinner, label kept	Slate spinner	n/a	n/a
Error	n/a	n/a	#D93B3B border, message below	n/a

General rules

Rule	Decision
Hover method	One scale step darker for filled elements, warm neutral tint for ghost and nav
Disabled method	40% opacity on buttons; gray fill and text on inputs
Focus ring	2 px #497079, 2 px offset, always visible on keyboard focus only
Selected item	Ink text, filled icon, 3 px Slate indicator on the left edge
Destructive actions	Red button only inside the confirmation step, never in the main row

Section 09

Iconography and imagery

Icons, illustrations, avatars and photos should feel like one family.

Icons	Specification
Style	Outline by default; filled version for the active nav item
Base library	Hugeicons (stroke rounded) or Phosphor Regular, the closest match
Stroke weight	1.5 px at 24 px
Corners and caps	Rounded
Sizes	16, 20 (nav and actions), 24 px
Color rule	#484848 default, ink when active, white on dark buttons
Accent icon	AI sparkle in #FBBE3C, used only for smart actions
Custom icons	list + link

Illustrations

Use case	Provided	File link
Empty states	☐	
Onboarding	☐	
Errors and 404	☐	
Success / celebration	☐	
Promo / update cards	☐	

Illustration style	Photo cutouts on Accent yellow grid cards; simple outline icons for small states	Color limit	Brand palette only, Accent yellow as backdrop
--------------------	--	-------------	---

Photos and avatars

Item	Specification
Photography in product	Yes: media in content, people cutouts in promo cards
Photo style	Natural light, soft muted warm tones, calm scenes, no stock clichés
Avatar shape	Circle
Avatar placeholder	Initials in #484848 on Neutral 100 to 200 circle
Online / status indicator	8 px green #0E9A50 dot with 2 px white ring, bottom right

Section 10

Data visualization

Charts are core to the Global Overview, City and County dashboards. They need their own palette and a consistent visual style.

Categorical palette (in order of use)

Watch. Swatches 1 to 5 are all blue-green. Test them for color-blind safety and lean on 6 to 8 when more than 3 marinas are compared. Do not reuse #10B981 as a series color where it also means positive revenue change.

Palette	Colors	Used for
Sequential	#E0F2FE to #0C4A6E (ocean light to ocean dark), 7 steps	Berth occupancy heatmap, busiest months
Diverging	#DC2626 · #E2E8F0 · #10B981	Occupancy or revenue vs target
Trend up / down	#10B981 / #DC2626	+12% vs last month, occupancy change
Highlight vs muted	#0369A1 / #CBD5E1	Selected marina in focus, other marinas faded

Chart style

Element	Specification
Gridlines	Horizontal only, #E2E8F0, dashed 3 px (light); #1E293B on dark. Currently both directions: drop vertical lines
Axis labels	label token (11 px), #64748B
Line weight	2 px (Occupancy Trends line)
Bar corner radius	4 px top only (Revenue bars)
Tooltips	White card, 1 px #E2E8F0 border, shows value + month + marina
Legends	Top right, 8 px round marker
Empty chart state	"No bookings for this period" + small boat icon
Number format	\$300K, \$163.5K, 1.2K berths, 91.2% (1 decimal). Labels: "Last 6 months", not "This month"

- ☐ Palette tested for color-blind safety (deuteranopia, protanopia, tritanopia)
- ☐ Series distinguishable on light and dark backgrounds
- ☐ Semantic red and green not reused as series colors

Section 11

Loading, empty and error states

These screens appear in the first week of real use and are usually the first place the brand gets lost.

State	Visual approach	Copy direction	Reference
Page loading	Skeletons in Neutral 100 with soft shimmer, matching card radius	None	
Inline loading	Spinner inside the pill button, label stays	Present tense: Saving	
Progress	Pill bar: green #0E9A50 fill on #E5E5E1 track, value right aligned (7/10)	Short label + count	
First use empty	Outline icon in a Neutral 100 circle + primary pill CTA	What this is + first action	
No results	Outline search icon + secondary pill: Reset filters	Say what was searched	
Error (section)	Inline banner, Error light bg #FDECEC, red icon, retry link	What happened + retry	
Error (full page)	Centered card on the canvas gradient, outline icon	Plain apology + next step	
404	Canvas gradient, logomark, pill button back home	Page not found + way back	
No permission	Lock icon in Neutral 100 circle	Who to ask for access	
Offline / maintenance	Accent yellow banner across the top	When it will be back	

Skeleton color #F1F0EC on white, #E5E5E1 on sidebar Shimmer

Yes, 1.4 s, subtle

Section 12

Motion

Motion should feel like the brand and stay out of the way of work.

Personality	Calm and smooth	Default easing	cubic-bezier(0.2, 0, 0, 1)
Token	Duration	Used for	
fast	120 ms	Hovers, toggles, checkboxes	
medium	200 ms	Dropdowns, tooltips, tabs	
slow	320 ms	Modals, drawers, page transitions	
chart	300 ms ease-out	Revenue Over Time and Occupancy Trends load and data updates on Refresh	

Rules

- ☐ Reduced motion setting respected: fade only, no movement
- ☐ No looping animation on working screens
- ☐ Celebration moments defined: onboarding complete, first booking created (soft yellow glow, no confetti)

Section 13

Voice, tone and formatting

How the product speaks in buttons, errors and empty states, plus consistent naming and number formats.

Sounds like

Calm, friendly, clear

Never sounds like

Pushy, robotic

Microcopy patterns

UI moment	Guideline	Example
Buttons	Verb first, sentence case, max 3 words	New booking
Errors	What happened + how to fix, no blame	Couldn't save the booking. Check the dates and try again.
Empty states	What this is + first action	No berths yet. Add your first berth to start taking bookings.
Success	Short, confirm result	Booking confirmed
Confirmations	Name action and consequence	Delete this marina? Its berths and bookings will be removed.
Tooltips	One short sentence	Edit booking

Formatting

Item	Format
Capitalization	Sentence case for buttons, headings, menus; uppercase only for sidebar group labels
Dates	3 Oct 2026; relative under 24 hours (12h, 16h)
Time	12h with am / pm, marina's local time zone shown
Numbers	1,234 in tables; 1.2K in compact counters
Currency	\$ before the amount, no decimals in summaries (\$300K), 2 decimals in invoices

Terminology

Use	Avoid	Meaning
Marina	Harbor, site	
Berth	Slip, dock space (in UI)	Slips are a berth type
Booking	Reservation	
Boat owner	Customer, client	

Section 14

Touchpoints beyond the product

Users meet the brand outside the main app too. These are often forgotten until launch week.

Touchpoint	What to provide	Provided	Link
Login and sign-up	Canvas gradient background with a centered white card (radius 20), logo top, Slate pill button	☐	
Onboarding	Welcome steps in white cards, green pill progress bar, Accent yellow highlight	☐	
Email templates	White body on #F1F0EC, Ink logo, Slate pill button, Poppins with system fallback, for welcome, reset, invoice, alerts	☐	
Notifications	Toast as white bordered card; in-app inbox list with avatar, green unread dot	☐	
Favicon and app icons	Logomark in Ink on white (light tab) and white on Slate (dark tab)	☐	
Social share (OG) image	1200 x 630, canvas gradient, logo and title in Ink	☐	
Exports	PDF / CSV export header with logo, Ink text, Neutral table lines	☐	
Invoices and billing	Logo top left, Ink and Neutral only, legal footer in caption size	☐	
Help center / docs	Sidebar style from the app, Neutral 100 code blocks	☐	
Status / maintenance page	Canvas gradient, logomark, one white status card	☐	

Section 15

Accessibility

Brand choices decide a large part of accessibility. Check them before the product designer starts building.

Target standard WCAG 2.2 AA Min text size 12 px (11 px only for uppercase labels)

Contrast checks

Foreground	Background	Ratio	Needed	Pass
White #FFFFFF	Primary 800 Slate #2F3740	12.1 : 1	4.5 : 1	✓
Neutral 900 Ink text #17191E	White #FFFFFF	17.6 : 1	4.5 : 1	✓
Neutral 600 body text #484848	White #FFFFFF	9.1 : 1	4.5 : 1	✓
Neutral 500 muted text #656565	Sidebar #F1F0EC	5.1 : 1	4.5 : 1	✓
Green link text #0E9A50	White #FFFFFF	3.6 : 1	4.5 : 1	✗
Ink text #17191E	Accent pill #F7E8A6	14.3 : 1	4.5 : 1	✓
Border default #E5E5E1	White #FFFFFF	1.3 : 1	3 : 1 (UI)	✗
Focus ring Teal #497079	White #FFFFFF	5.4 : 1	3 : 1 (UI)	✓
Dark mode text #F2F2EF	Dark surface #1A1D21	15.1 : 1	4.5 : 1	✓

Fix. Green #0E9A50 on white is under 4.5 : 1, so it passes only for large or bold text. For small green links use Green 700 #0B6B37. The default border is decorative and below 3 : 1; inputs need Border strong #D9D9D6 plus a label, or a darker #A3A39F border.

Checklist

- ☐ Meaning never shown by color alone (add icons, labels or patterns)
- ☐ Focus ring visible on every interactive element
- ☐ Touch targets at least 44 x 44 px on touch devices
- ☐ Status badge and chart colors distinguishable for color-blind users (Confirmed vs Cancelled, Available vs Maintenance)
- ☐ Reduced motion supported
- ☐ Fonts readable at the smallest size used

Section 16

Brand context and product rules

The why behind the brand, so the product designer can make good calls on cases this guide does not cover.

Item	Details
Target users	Marina company admins and marina managers; secondary: dock staff and front desk. Small to mid-size operators running 1 to 50 marinas. Moderate tech comfort, often on a desktop in the office and a tablet on the dock
Problem solved	One place to run every marina: see berth occupancy, bookings, staff and revenue across all locations, and act on them without spreadsheets
Positioning	Multi-location first (Global, County, City views) with a clean, modern UI, unlike older desktop-style marina software
How the product should feel	Calm, trustworthy, clear
Competitors	Dockwa, Molo, Harbour Assist, Marina Master, Scribble Software, Pacsoft

References

Area	Reference	What to take from it
Overall mood	Moodboard link	Coastal and nautical calm: ocean blues, white space, light seafoam accents. No heavy maritime clichés (rope, wood textures)
Table density	Linear, Stripe Dashboard	Compact but readable tables for Bookings, Berths and Staff (about 48 px rows, sticky header)
Chart style	Stripe, Vercel Analytics	Simple bar and line charts for Revenue Over Time and Occupancy Trends, clean axes, formatted values (\$300K)
Navigation	Current prototype (cub-phase-8 6625593.figma.site)	Grouped left sidebar (Dashboards, Management, Operations, Analytics, System) with breadcrumbs in the header

Do and don't in the product

Do	Don't
Keep ocean blue #0369A1 for New Booking, Add Marina, active sidebar item and focus	Use it as a large background, except the location hero banner
Keep Bookings, Berths, Staff and Locations tables neutral (white, #E2E8F0 borders)	Add gradients; keep gradients to the login button and hero banner only
Use green only for revenue and positive change, red only for Cancelled, Maintenance alerts and Delete	Use red or green for decoration
Label every icon action (view, edit, delete) with a tooltip and confirm before delete	Rely on icons alone in table rows
Calculate every total from the same data so pages agree (marinas, berths, revenue)	Show sample numbers that contradict another page

Section 17

Deliverables and sign-off

What gets handed over, who owns what after handoff, and how the brand is tested before it is locked.

Deliverable	Format	Provided	Link
Figma library: colors and type as variables (primitives)	Figma	☐	
Starter semantic tokens (bg, text, border, action)	Figma variables	☐	
Design tokens export	JSON	☐	
Logo and icon package	SVG, PNG	☐	
Fonts or font links	Poppins and Inter, Google Fonts URL	☐	
Illustrations	SVG, PNG	☐	
Email template	Figma / HTML	☐	
This guide	PDF	☐	

File naming brand-logo-horizontal-dark.svg
(kebab case: asset-variant-theme)

Licenses Poppins and Inter: SIL Open Font License; icons: library license [link](#)

Ownership after handoff

Area	Owner	Approves changes
Brand primitives (raw colors, fonts, logos)	Brand designer	Brand designer
Semantic tokens	Product designer	Both
Components, layouts, density	Product designer	Product designer
New brand needs found in product	Product designer raises	Brand designer

Pressure test before sign-off

The product designer builds one dense screen with the brand before anything is locked.

- ☐ Bookings table, 20+ rows, filters and status badges
- ☐ Revenue chart with 5+ marinas as series
- ☐ Form with error, disabled and focus states
- ☐ Stat cards with up and down trends (occupancy down, revenue up)
- ☐ Same screen in dark mode
- ☐ Empty state and loading state
- ☐ Issues logged and fixed in Figma
- ☐ Guide updated to new version

Sign-off
